DETAILED ACTION

This Office Action is in response to the Amendment filed on 05/08/2009.

Claims 1 and 10 were amended.

Applicant's arguments, see Pages 5-6, filed on May 08, 2009, with respect to the rejections of claim 1 under 112, second paragraph have been fully considered and are persuasive. The rejections of claim 1 and its dependent claims 3-11 have been withdrawn.

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose or renders obvious the claimed combination of An internal combustion engine having a combustion chamber; first and second inlet valves controlling flow of air into the combustion chamber; first and second exhaust valves controlling flow of combusted gases out of the combustion chamber; and first and second turbo-chargers; wherein the first turbo-charger is connected to the first inlet valve and the second turbo-charger is connected to the second inlet valve; charge air supplied to the combustion chamber via the first inlet valve is pressurized only by the first turbo-charger; charge air supplied to the combustion chamber via the second inlet valve is pressurized only by the second turbo-charger; and including:

"the first turbo-charger is connected to the first exhaust valve and receives only combusted gases expelled via the first exhaust valve;

the second turbo-charger is connected to the second exhaust valve and all combusted gases expelled via the second exhaust valve flow to the second turbocharger without passing through the first turbo-charger; and a valve operating means for controlling operation of the first inlet valve and first exhaust

Art Unit: 3748

valve independently from the operation of the second inlet valve and second exhaust valve thereby providing variation in the ratio of the mass of charge air supplied to the combustion chamber via the first inlet valve to the mass of charge air supplied to the combustion chamber via the second inlet valve, wherein [such] said valve operating means [is capable of] for operating in different modes of operations, including:

a first operating mode in which the [the] second inlet valve and the second exhaust valve are deactivated whereby all charge air supplied to the combustion chamber is pressurized by the first turbo-charger and delivered via the first inlet valve;

a second operating mode in which the [the] first and second inlet valves and the first and second exhaust valves operate simultaneously whereby charge air supplied to the combustion chamber is pressurized by both of the first and second turbo-chargers and delivered via both the first and second inlet valves; and

a third operating mode in which the [the] first inlet valve and the first exhaust valve are deactivated whereby all charge air supplied to the combustion chamber is pressurized by the second turbo-charger and delivered via the second inlet valve."

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
